

Chienna A. Gamboa

BSIT 3-D

1. Purpose

This Acceptable Use Policy (AUP) defines the proper use of IT resources in the NUEST San Isidro Campus computer laboratory. It aims to ensure a safe, respectful, and productive environment for all BSIT students during laboratory sessions.

2. Scope

This policy applies to all BSIT students who use school IT resources including:

- Computer laboratories and school-owned devices
- School internet connection and network
- Any activity that requires the use of a computer or internet such as laboratory classes, research, and On-the-Job Training (OJT) related tasks

3. Acceptable Use

Students are allowed to:

- Use computers and the internet for laboratory activities and class requirements
- Access websites and online tools needed for research and academic tasks
- Develop, run, and test programs as part of their coursework
- Use school resources for OJT-related work and documentation

4. Prohibited Activities

Students are NOT allowed to:

- Access illegal or inappropriate content
- Download or install unauthorized software
- Use another student's account or share passwords
- Plagiarize or copy academic work of other student without proper credit
- Use school resources for personal business or non-academic activities
- Damage or tamper with any school equipment

5. Student Responsibilities

All students must:

- Keep their login credentials private at all times

- Log out of all accounts after every use
- Take care of school equipment and keep the laboratory clean
- Report any damaged equipment or suspicious activity to the laboratory instructor
- Follow the instructions of the laboratory-in-charge at all times

6. Monitoring and Privacy

- NUEST-SIC reserves the right to monitor network activity, computer usage, and system logs to ensure compliance with this policy
- Students should not expect full privacy when using school-owned devices, networks, or platforms
- Monitoring is conducted strictly for academic, administrative, and security purposes in accordance with applicable laws

7. Violations and Consequences

Failure to comply with this policy may result in:

- Written warning and formal counseling
- Suspension of access to school IT resources and computer laboratories
- Filing of academic disciplinary charges in accordance with the NUEST Student Handbook
- Grade deduction or failure in the relevant subject, as applicable
- Referral to appropriate legal authorities for violations involving cybercrime under Republic Act No. 10175 (Cybercrime Prevention Act of 2012)
